Offley Infant and Junior School Amalgamation, Sandbach

Client : Cheshire East Council
Value: £850K
On Site: June '10 to March '11
Programme: 42 Weeks
Contractor: Conlon Construction Ltd

Project Profile

Under Cheshire County Council's Transforming Learning Communities initiative, TNW were appointed to undertake a feasibility study to amalgamate Offley Infant and Offley Junior School to form an all through 1.5 form entry primary school with a linked foundation stage unit.

The proposals involved the construction of a new accommodation block to link the junior and infant schools, through the formation of a new central entrance, and associated administration facilities, together with a centralised resources hub. The scheme also enhances the existing circulation and facilitates future community development should funding become available. The Nursery will be run by a private provider who will move into surplus accommodation.

The proposals were carefully phased to maintain the operation of the School throughout and minimise disruption. The scheme received funding through Cheshire East Borough Council and was completed in 2011.
